Team IDK

Michael Pinnegar, James Power
Dan Stottlemire, Michael Irwin

Meeting Called By:	Team IDK	Attendees:	Dan Stottlemire
Type of Meeting:	Project overview		Michael Pinnegar
Date:	June 29rd, 2009		Michael Irwin*
Time:	7:00 PM		James Power
Location:	Caldwell Labs		*secretary

Record

High Level Design / Understanding Concepts   Presenter Name: Team IDK

Discussion: Discussed the exact way that all of our methods would function together as well as drew out a diagram to further the understanding of all members of the group. The group decided that it would separate the function of the interpreter and an "executer." This separation would further the flexibility the group has for further additions and lab assignments. The group also decided that a generic "getBits" function would be useful in order to gather the specific bits needed for each operation. This function would be written in a utility class that is extended by the other classes in order to spread its availability.

Type: Planning

Other Information:

Setup a schedule to be doing coding and begin testing. We decided that Wednesday, July 8th that we would be done programming and begin testing. Doing so would give us roughly a week to test our program and work out any bugs. We are also going to try and be completely done with the majority of the programmers guide by Sunday, July 5th.

The group decided to use meetings on Tuesday and Thursday to be the primary code laying for the group and setting up the exact structure while Monday and Wednesday were going to be more planning and discussion. This pattern may however change as we get closer to the deadline.

Action Items:	Person Responsible:	Deadline:
Documentation Outline	Michael Irwin	June 30th, 2009
Group Understanding of Problem	All Members	June 30th, 2009
Strategy for completing specific methods	All Members	June 30th, 2009
